SUMMARY

Data Analyst based in Dubai with Microsoft PL-300 and Google Data Analytics certifications. Skilled in SQL, Power BI (DAX, Power Query), Python and Excel for data cleaning, data modelling, ETL and KPI dashboards. Currently completing an Amazon people analytics externship, with hands-on projects in Dubai real estate, Airbnb market analysis and AWS data pipelines.

EXPERIENCE

Operational Strategy & People Analytics Extern

Sep 2026 – Present

Extern (Amazon-sponsored externship)

Remote

- Researched Amazon Fulfillment Center roles and wrote a one-page briefing note framing employee attrition as an operational risk, with root causes and next steps for leadership.
- Collected and reviewed employee feedback from Glassdoor and YouTube to find turnover drivers, identifying management issues as a key cause.
- Cleaned and organised the employee review data using Python (Pandas) in Google Colab to prepare it for analysis.

PROJECTS

Airbnb Market Analysis | MySQL, Power BI, DAX

Sep 2026

- Cleaned 280K listings across 10 cities in MySQL, fixing nulls and blanks and standardising 180+ messy host-location values into country names.
- Discovered that host communication and cleanliness affect guest ratings the most, and budget listings (\$50–100) score higher than luxury ones (\$1,000+).

Dubai Real Estate Market Analysis | Power BI, DAX, Power Query, Excel

Aug 2026

- Modelled 93K+ rows from 5 tables (2020–2026) into a star schema in Power BI, after cleaning off-plan, secondary sales and rental data in Excel and Power Query.
- Identified that properties under \$1,000/sq.ft earn 8–12% rental yield vs about 7% for luxury homes, showing mid-priced properties are the better pick for income investors.

Airline Passenger Satisfaction Analysis | Power BI, Power Query, Excel

Jul 2026

- Analysed 129K+ passenger survey responses across 14 service ratings in Power BI to find what drives customer dissatisfaction.
- Found 57% of passengers were dissatisfied and online services scored lowest (2.91/5 vs 3.42/5 for on-board services); recommended improving online booking and Wi-Fi first.

COVID-19 Vaccination Data Pipeline | AWS S3, Glue, RDS (PostgreSQL), Python

Apr 2026

- Built an ETL pipeline moving 5,000+ vaccination records from Amazon S3 through AWS Glue into PostgreSQL on Amazon RDS.
- Wrote the ETL job in Python to clean and transform the data before loading it into the database.

SKILLS

- Data Analysis: Data Cleaning, Data Modelling (Star Schema), ETL, Exploratory Data Analysis (EDA), KPI Reporting, Dashboard Design
- Tools: SQL (MySQL, PostgreSQL), Power BI (DAX, Power Query), Excel (Pivot Tables, XLOOKUP), Python (Pandas, NumPy), Tableau, R (basic)
- Cloud: Amazon S3, AWS Glue, Amazon RDS

EDUCATION

B.Tech, Computer Science & Engineering

2021 – 2025

Allenhouse Institute of Technology (Affiliated to AKTU), Uttar Pradesh, India
CGPA: 7.23/10 (First Division)

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Google Data Analytics Professional Certificate
- Microsoft Power BI Data Analyst Professional Certificate (Coursera)
- Data Analytics Certificate, PW Skills
