SUMMARY

Results-driven Data Analyst with expertise in SQL, Python, Power BI, and Tableau, specializing in transforming complex datasets into actionable business insights and interactive dashboards. Experienced in data extraction, cleaning, transformation, exploratory data analysis (EDA), statistical analysis, and business intelligence reporting to support data-driven decision-making. Proven ability to analyze large-scale datasets exceeding 5 million records, optimize data workflows through cloud-based ETL pipelines, and develop visualization solutions that improve operational efficiency and business performance

EXPERIENCE

Bellabeat Fitness Case Study

03/2026

- Leveraged SQL and Microsoft Excel to analyze 940,000+ Fitbit activity records, evaluating user engagement, physical activity trends, calorie expenditure, and sleep performance to uncover meaningful behavioral insights.
- Cleaned data, conducted EDA and analysis. Active users burned 30-40% more calories. 45% had inconsistent activity and poor sleep.
- Created Tableau dashboards for visual insights, boosting user engagement by 10-20% with wellness initiatives.
- Created strategic recommendations from analysis. Delivered executive reports to clarify customer behavior, optimizing health and wellness campaigns.

Cyclistic Bike Share Case Study

02/2026 - 03/2026

- Processed and analyzed 5,000,000+ bike-share transactions using R and Power BI to evaluate customer behavior, usage trends, and membership patterns across casual and annual riders.
- Conducted behavioral segmentation and trend analysis, revealing that casual riders used bicycles 20-25% longer, while 60% of rides occurred during weekends, highlighting significant opportunities for targeted membership conversion.
- Developed dynamic Power BI dashboards and data visualizations that provided strategic recommendations to support marketing initiatives, with an estimated 10-15% increase in membership revenue.
- Interpreted data to deliver insights for customer segmentation, planning, and decisions.

COVID-19 Vaccination Analytics using AWS QuickSight

04/2026

- Developed a cloud-based analytics solution by integrating Amazon S3, AWS Glue, PostgreSQL (Amazon RDS), and AWS QuickSight to automate ETL processes and streamline end-to-end data reporting.
- Automated the extraction, transformation, and loading of 5,000+ vaccination records using Python-based ETL workflows, reducing manual processing time by 80% while improving data accuracy and operational efficiency.
- Delivered interactive AWS QuickSight dashboards that visualized vaccination trends, regional distribution, and key performance indicators, enabling stakeholders to monitor performance through real-time business insights.
- Optimized cloud data workflows, enhancing BI processes and enabling faster, data-driven decisions.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science & Engineering

Allenhouse Institute of Technology, Uttar Pradesh, India

2021 - 2025 Uttar Pradesh, India

- Affiliated with Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow

SKILLS

Key Tools

Programming: SQL, Python (Pandas, NumPy), R Business Intelligence: Power BI, Tableau

Databases: PostgreSQL, MySQL Cloud Platforms: Amazon S3, AWS Glue, Amazon RDS, Power BI service

Productivity: Microsoft Excel

SKILLS

Skills & Expertise

Data Analysis & Interpretation	Analytical Thinking	SQL Query Development	Problem Solving
Python for Data Analytics	Critical Thinking	Data Visualization	Data-Driven Decision Making
Business Intelligence Reporting	Attention to Detail	ETL & Data Transformation	
Communication & Presentation	Exploratory Data Analysis (EDA)	Stakeholder Collaboration	
Statistical Analysis	Time Management	Dashboard Development	Adaptability & Continuous Learning
Data Modeling & KPI Analysis	DAX		

CERTIFICATIONS

Google Data Analytics Professional Certificate Google	Data Analytics Certification Physics Wallah
Microsoft Certified: Power BI Data Analyst Associate (PL-300) Microsoft	Microsoft Power BI Data Analyst Certificate Microsoft
